New, Improved 4000 Series SmartRoll® UnderStencil Wiping Material from JNJ Offers Better Performance with Vacuum Systems

Franklin, Massachusetts, USA – JNJ Industries' new and improved 4000 Series SmartRoll® UnderStencil Wiping Rolls offer improved performance with today's advanced vacuum-equipped printing machines for electronic materials such as solder pastes. Series 4000 rolls are considered the industry standard for understencil wiping, and now offer better cleaning performance, including enhanced absorption, lower surface lint, and better compatibility with vacuum assisted wiper systems. JNJ's new and improved SmartRoll® 4000 Series UnderStencil Wiping Rolls are made from advanced Sontara® cleanmaster stencil cleaning fabric from DuPont™, a non-woven, extra strength material with excellent wetting characteristics.

Wiping with JNJ's SmartRolls prevents smearing, bridging, solder balls, and other problems associated with the stencil printing of solder paste onto circuit boards. SmartRolls effectively remove residual solder paste, flux, inks, and epoxies with or without solvent. They are Cleanroom-grade, tough, and absorbent, and resist tearing and shredding. Approved for use on the advanced machines from DEK, Panasonic, MPM, KME, and SMTech, and others, SmartRolls are porous enough to allow the airflow of a vacuum system to penetrate the material, yet are extremely strong and very low in lint. SmartRolls are ideal for both vacuum and non-vacuum understencil wiping systems, are very absorbent, and prevent the solvent from the solvent bar systems from "wicking" through the material. Each SmartRoll is individually shrink-wrapped in a protective static-dissipative film, and has unlimited shelf life.

As the world's #1 supplier of understencil wiping rolls and materials, JNJ Industries offers SmartRolls in the widest range of sizes, including custom sizes and lengths even in single-case quantities, with extremely fast delivery guaranteed even for custom orders. They are sold worldwide through distribution.

JNJ Industries, Inc. is a leading supplier of electronics screen-printing accessories, cleaning chemistries, ultrasonic cleaning equipment, and specialized tooling products. For more information visit www.jnj-industries.com, or contact the company at 290 Beaver St., Franklin, Massachusetts, 02038 USA, Tel. (800) 554-9994; Fax: (508)-553-9973; Outside the US: 001.508.553-0529; Fax 001.508.553.9973.
