

March 16, 2012

To All JNJ Industries Customers, Distributors, and Re-sellers:

This letter is to declare that all JNJ Industries products and part numbers are in full compliance with the REACH program, and that no product manufactured by or offered for sale by JNJ Industries contains any of the Substances of Very High Concern (SVHC) as defined on the updated candidate list containing 73 substances that was updated and published in December 19, 2011 by the European Chemicals Agency (ECHA). It should be further noted that:

1. JNJ Industries is aware of the REACH legislation and how it could potentially affect our business.
2. Our company has already taken steps to comply with the Reach legislation by pre registering all of our products in the EU. We have submitted all of our product information complete with CAS numbers and EINECS/ELINCS numbers for all of the raw materials used in virtually all of our products. We can supply submission numbers and reference numbers for all of the JNJ products that were pre-registered. Information will be supplied upon written request from customers on a case by case basis. Our products were pre-registered through our sales agent in Hungary.
3. We have neither plans nor any requirement to discontinue or alter any of our products due to the REACH legislation.
4. No JNJ products contain any of the 73 substances listed on the SVHC Candidate list.

JNJ Industries
290 Beaver Street
Franklin, MA 02038
