SAFETYSMART® HAND CARE & SKIN PROTECTANT PRODUCTS

INSIDE THIS ISSUE:

SAFETYSMART PRODUCTS	1
SAFETYSMART HAND SANITIZER	1-2
SAFETYSMART BARRIER CREAM	3
HAND CLEANERS	4

SafetySmart® hand care and skin protectant products from JNJ Industries includes a Hand Sanitizer Lotion, Instant Foam Hand Sanitizer, Hand Sanitizer Wipes and Barrier Cream. All SafetySmart products are alcohol and fragrance free, non-flammable and non-toxic. Effective protection anywhere germs or irritants are found. ■■

SAFETYSMART® HAND SANITIZER

SafetySmart® Hand Sanitizer is a unique, patented, FDA compliant skin antiseptic containing a broad spectrum of antimicrobial activity that forms a protective film on healthy skin. Each protective molecule is surrounded by PERSISTENT antimicrobial activity to inhibit the growth of and kill a wide range of potential disease-causing bacterial pathogens and microorganisms. As an over-the-counter waterless hand disinfectant, it can be used to provide protection where sinks are not readily available or in-between regular hand washings. With proper use, Safety-

Smart protects against self and/or cross contamination of bacteria. SafetySmart significantly reduces bacterial pathogens that cause disease on contact. One dime sized amount of SafetySmart has been clinically proven to be extremely effective in killing 99.99% of common germs and bacteria that may cause illness. It takes more than 240 applications of an alcohol based sanitizing gel to equal the effectiveness of a single application of Safety-

Smart. Implementing this product into your daily hygienic routine can help significantly reduce the chances of becoming sick by up to 85%. SafetySmart moisturizes and soothes the skin with a Vitamin E enriched formula. Unlike alcohol based gels, which dry out the skin, SafetySmart moisturizes and improves the skin with continued use. ■■

WHY SAFETYSMART...

- Alcohol Free
- NO Triclosan
- Fragrance Free
- Non-flammable
- Non-toxic
- Moisturizes & Conditions
- Instant Germ Killer
- Kills 99.99% of Pathogenic Bacteria
- Protects up to 4 Hours
- Vitamin E Enriched
- Lasts Hundreds of Times Longer than Alcohol Gels

BENZALKONIUM CHLORIDE

Benzalkonium Chloride is an **alcohol free & fragrance free** antimicrobial compound that has been widely used in the health care industry for more than 50 years. It has been used in formulas for surface cleaners, sterilizing agents, and leave-on FDA Monograph antibacterial skin treatment products. Its chemical properties make it an excellent candidate for persistent antimicrobial activity in mammalian tissue (skin).

COMPARISON CHART — SAFETYSMART SANITIZER VS. ISOPROPYL ALCOHOL

<i>SafetySmart Hand Sanitizer</i>	<i>Standard Alcohol Gels</i>
Instant Germ Killer w/ Extended Protection	Instant Germ Killer (no residual effects)
Remains Effective After Hand Washing	Evaporates / Washes Off w/ Water
Alcohol and Petroleum Free	Alcohol Based
Contains Vitamin E and Dimethicone Emollients	Most Do Not Contain Emollients and Moisturizers
Soothes and Moisturizes Dry Skin w/ Vitamin E	Extremely Drying to Skin
Helps Improve the Quality of Skin	Causes Irritation and Flaking of Skin
Reapply Every 2-4 Hours	Must Reapply Every 10 Minutes
Non-flammable	Flammable
Fragrance Free	Strong Alcohol Odor

WHAT DOES THIS MEAN TO YOU...

- ⇒ Once the alcohol gel dries, you are no longer protected from germs because there is NO persistent antimicrobial activity.
- ⇒ Alcohol gels are flammable, as they usually contain at least 60% or more of either Isopropyl Alcohol (IPA) or Ethyl Alcohol (Ethanol). Alcohol sanitizers create a fire hazard in storage areas, kitchens and other areas where an ignition source is present.

- ⇒ IPA is toxic if ingested and Ethanol is found in alcoholic beverages. Alcohol gels should be kept out of the reach of children. If consumed, children may be poisoned, become sick or get inebriated. IPA can cause blindness if swallowed or comes in contact with eyes.
- ⇒ Alcohols are drying and remove the natural oils found in the skin, making your skin more susceptible to germs and infections. SafetySmart moisturize and condition your skin and helps to heal damaged skin with regular use.
- ⇒ SafetySmart not only kills germs on contact, but will continue to kill germs for several hours until your skin exfoliates naturally. It will hold up to several hand washings, leaving skin smooth and protected.
- ⇒ SafetySmart is fragrance free and won't leave the essential oils associated with many fragrances that can cause allergic reactions.

PACKAGING & ORDERING INFORMATION

SafetySmart Hand Sanitizer with moisturizers is available as a lotion, instant foam and saturated wipes. The lotion will moisturize and condition your skin, while killing germs and disinfecting your hands, leaving them with a soft and silky after-feel. The Instant Foam pump dispenses a fast drying, non-sticky foam that contains an unique non-drying, conditioning and moisturizing hand sanitizer. The antibacterial wipes will sanitize, while the durable fabric cleans the toughest messes without leaving behind a soapy or sticky

residue. This gentle formula kills microbes in seconds and helps to reduce the risk of infection and illness, while helping to keep your skin soft and healthy.

SAFETYSMART® BARRIER CREAM

SafetySmart® Barrier Cream is a blend of natural ingredients that provide effective protection against a variety of soils and irritants. It is a specially formulated, non-greasy, lightweight and fast drying protectant lotion that forms an invisible barrier on

healthy skin. Barrier Cream is alcohol and fragrance free and its unique formulation

soothes and moisturizing dry, irritated skin while offering protection from a variety of chemicals, odors and aggressive soils. A single application will last up to 4 hours, when the skin naturally exfoliates, and will hold up to multiple regular hand washings.

Barrier Cream forms a protective, waterproof barrier which helps to prevent irritants, allergens and bacteria from having direct contact with the skin. It locks in moisture to keep skin healthy and locks out chemicals that can remove skin's natural oils. It's a lightweight cream that absorbs quickly and contains no coarse or abrasive substances.

Barrier Cream utilizes two distinct ingredients: 1) Dimethicone made from processed silica or beach sand; 2) Lanolin which is derived from highly refined wool oil. This dual protection formula helps to protect skin from natural and synthetic irritants. Blended with these protective ingredients are moisturizers such as; Mineral Oil, Wheat Germ Oil and Vitamin E so that skin stays hydrated and healthy. When the skin's natural oils are removed, the skin dries out and can become hard and cracked, causing splits and cuts that cause nerve pain, leaving the area susceptible to infection and disease. ■ ■

MORE REASONS TO USE SAFETYSMART BARRIER CREAM

- ⇒ SafetySmart Barrier Cream has been formulated to help prevent dry skin conditions such as eczema and dermatitis.
- ⇒ Forms a waterproof barrier which prevents irritants, allergens and bacteria from having contact with skin.
- ⇒ Invisible barrier makes soil clean up fast and easy.
- ⇒ Contains ingredients which soothe, moisturize and condition skin.
- ⇒ The barrier lasts for up to 4 hours and is waterproof so hands can be washed and the protective barrier remains active. Comes off when your skin naturally exfoliates!
- ⇒ Does not contain any steroids, alcohol or fragrance. Other barrier creams contain one or more of these components.
- ⇒ It is a lightweight cream which absorbs quickly and easily into the skin, leaving hands protected, yet soft and smooth.
- ⇒ Regular use will help to prevent nerve pain associated with dry, cracked and swollen fingers

THE INDUSTRY STANDARD IN QUALITY AND PERFORMANCE

GLOBALTECH® HAND CLEANERS

JNJ's Hand Cleaners are high performance, general purpose cleaners in a saturated wipe dispenser. Laboratory Certified to be effective in the removal of toxic metals from all surfaces, including the skin. Used at the workstation or any location where operators/technicians' hands become soiled. Cleans hands, surfaces, fixtures and tools without requiring

the operator to leave the work area. Certified Ionic Contamination Test results show that our Hand Cleaners are well within ANSI/J-STD-001 Industrial and MIL-STD-2000 Military Standards adopted to maintain acceptable levels of cleanliness in the manufacture of electronic assemblies, circuits and components.

Toxic Metal Reduction - Due to a unique solvent and surfactant blend, coupled with a powerful chelant, our Hand Cleaners are effective in the removal of lead and other toxic metals from all surfaces including the skin.

It's in the wipe... Our industrial Hand Cleaner has dual action wipes with a smooth side for lighter cleaning and a textured side for tougher jobs. Our Benchtop and Workstation Hand Cleaners have a hi-tech, low

PRODUCT HIGHLIGHTS

- High Performance General Purpose Cleaner
- Removes Oil & Grease
- Lab Certified to be Effective in Removing Toxic Metals from Skin
- Penetrates Quickly to Safely Remove Contamination
- Residue Free (Amine, Salt & Silicone Free)
- ANSI/J-STD-001 Industrial and MIL-STD-2000 Military Standards
- Fast Drying — Enhances Production Time
- Cleans: Hands, Work Surfaces, Fixtures & Tools
- Pleasant Odor
- Helps Prevent Ingestion of Hazardous Substances
